

Chapter 5 - Practice Set

- 1 Create an app using ListView to display the contents of an string array with onClick listeners
- 2 Create an app using RecyclerView from ①
- 3 Create an app using RecyclerView to display contents of the "Contact" array which looks like this:

```
public class Contact {  
    private int Sno;  
    private String phoneNo;  
    private String name;  
}
```
