

Chapter 6 - Practice Set

- 1 Write a program using prompt function to take input of age as a value from the user and use alert to tell him if he can drive!
- 2 In Q1 use confirm to ask the user if he wants to see the prompt again
- 3 In the previous question, use console.error to log the error if the age entered is negative
- 4 Write a program to change the url to google.com (Redirection) if user enters a number greater than 4
- 5 Change the background of the page to yellow, red or any other color based on user input through prompt.
